John Ogama • JohnDOgama

Technical Skills

Languages: TypeScript, JavaScript (ES6+).
Frontend: React.js, React Native, Next.js, Tailwind CSS, Zustand, React Query, ShadCN UI, Redux.
Backend & Database: NestJS, Node.js, GraphQL, PostgreSQL, TypeORM, Drizzle ORM.
Tools & Infrastructure: Git, Docker, AWS, Vercel, Railway, Postman, Jest.
Web3: Ethers.js, Privy Auth.

Work Experience

Frontend Developer
Mar 2026 - Nov 2026

Geiger | Full-time | United States (remote)

- Migrated the site from C8 to C11, using Payload CMS to build the e-commerce platform.
- Worked on the ERP system to replicate how the C8 version was set up in C11.
- Coordinated closely with the Account Manager to clarify store requirements and ensure data was aligned before migrating to C11.

Frontend Developer | AI-Driven Development
Nov 2025 - Feb 2026

WYNTAP Inc | Contract | Philippines (remote)

- Utilized AI-assisted development tools such as Cursor AI to improve development efficiency and accelerate feature delivery.
- Handled the full frontend of a backoffice bulk upload tool — built the UI, wired up the Excel file processing flow, and integrated the backend APIs to automate user data onboarding.
- Developed the frontend for a Google Drive-like file management feature, converting Figma designs into a fully working Angular interface with complete API integration.
- Maintained the UpEnglish IELTS platform by fixing bugs, resolving UI issues, and making code improvements to keep the platform stable and reliable for active users.

Software Developer
Sept 2025 - Nov 2025

Affirmdata | Contract | United States (remote)

- The client's app built on Bubble (no-code) was suffering from infinite loading, slow renders, and no pagination — making it unusable for heavy data workflows.
- Owned the frontend side of the migration from Bubble to Next.js — rebuilt all views from scratch with proper pagination, skeleton loading, and an improved UI/UX and working alongside the backend team on NestJS, PostgreSQL, and GraphQL.
- Resolved all critical performance issues within 2 months — the app went from broken and slow to fully functional, with faster load times, stable rendering, and an improved overall UI/UX.

Full-stack Engineer
July 2024 - Sept 2025

Mobii PH | Fulltime | Philippines (remote)

- Developed a mini dApp on the KAIA blockchain that served more than 200,000 registered users within the LINE ecosystem.
- Integrated smart contracts and multi-chain features using Ethers.js and Privy Auth, enabling secure wallet authentication and contract interactions.
- Collaborated with designer to convert Figma designs into production-ready React components and implemented waitlist features to support user onboarding.

Frontend Developer *Nov 2023 - Aug 2025*

1TechHub | Freelance | Australia (remote)

- Built a modular admin dashboard using Next.js with reusable components to support long-term scalability and maintenance.
- Converted Figma designs into responsive and consistent user interfaces across multiple screen sizes.
- Improved application responsiveness using Zustand and optimistic UI updates while reducing unnecessary API requests.

Education

Bachelor of Science in Computer Science (Undergraduate) *Nov 2022 - Sept 2025*

Asian institute of Science and Technology - Dasmariñas
